

# MBH Rotunda Abszolút Hozamú Származtatott Alap

(MBH „Rotunda” Total Return Derivative Fund)

Monthly Fact Sheet – 31 March 2025

www.mbalapkezezo.hu

## Investment policy

The investment objective of the fund is to achieve higher return than the annual minimum return limit set in the fund's management regulations. The Fund is managed actively, in an absolute return approach. The Fund has the capacity to use leverage (and have short positions), which may result in significantly higher risk taking than average absolute return funds. The Fund has no geographical specification and no specific industry exposure. The Fund's potential investment area is as broad as possible: bank deposits and other money market instruments; government or corporate bonds; mortgage bonds, other debt securities; mutual funds, exchange traded funds; domestic and international equities; certificates, derivatives on bonds, foreign exchange, commodities, interest rates, indices and other instruments.

## Recommended for

Those who are ready to maximize the long-term return on their investments with high risk-taking; those who are looking for a form of investment that is flexible thereby has the capacity for favourable performance irrespective of the market environment; those who want to make long term savings or achieve long-term goals, beyond a 5-year time horizon (eg pension goal, purchase of real estate, big-ticket spending etc.) as part of a multi-element investment portfolio

## Investment activity

In March, the Fund's risk level was nearly 10%, we closed the hedge positions. The largest strategic positions continue to be in the defence sectors and we bought some exposure in the basic resources sector which took a huge hit. We closed our tactical positions last month. In terms of net FX exposure, the Fund ended the month at around 5%, with mostly open positions in european currencies against the HUF.

## Glossary

**Unit Price (Net Asset Value per Unit):** shows how much of the Fund's assets are available per unit, at which value units can be purchased or redeemed. We present the unit price according to the date of preparation of the report - the last distribution day of the previous month.

**Settlement:** how long after the purchase / redemption order the financial settlement takes place. (Eg: in the case of day T + 3, the transaction will be settled according to the unit price valid on the 3rd trading day after the order is placed.)

**Investment period:** the investment period is usually divided into short, medium and long term. In the short term, they typically think for a period of about one year, in the medium term for a period of about one to three years, and in the long term for more than 5 years. The recommended minimum investment period is determined in relation to the Fund's risk (the degree of historical exchange rate fluctuations experienced).

**ISIN:** (International Securities Identification Number): a unique international identifier for securities.

**Aggregate risk indicator:** provides guidance on the risk level of this product relative to other fund products. It shows how likely this product is to cause a financial loss because of the market movements or because we cannot pay you. The indicator is based on the fluctuations in daily returns of the retrospective values modelled on the Fund's theoretical portfolio composition over the past 10 years. Lower values typically mean lower risk and lower expected returns, while towards higher values the risk and expected return increase. This classification may change over the life of the Fund.

**Net asset value:** the assets of investment funds less the value of their liabilities, the market value of the total assets managed by the fund. We present a value determined according to the date of preparation of the report - the last distribution day of the previous month.

**Portfolio:** means the composition and totality of the assets held by investment funds.

**Standard deviation:** the average deviation of the yields from the average value, ie the fluctuation of the daily yields achieved in the past, the table shows data (6 years, 1 year and 3 years) looking back from the date of reporting - the last distribution day of the previous month.

**Sharpe ratio:** the ratio of excess return over risk-free return to standard deviation, the table shows data for the 6-month, 1-year and 3-year periods from the date of reporting to the date of reporting - the last trading day of the previous month.

**Max Drawdown Indicator:** Shows the percentage of the largest rate drop since the start of the Fund compared to the highest exchange rate value achieved in the past.

## Legal disclaimer

More detailed information about the costs related to distribution (purchase, holding, redemption) of investment units, the risks and investment policy of the Fund, is available in the Fund's Prospectus and Management Policy, as well as at the distribution places.
