

MBH Bonitas Dollár Kötvény Alap

(MBH Bonitas Dollar Bond Fund)

Monthly Fact Sheet – 30 April 2025

www.mbalapkezelelo.hu

Investment policy

The Fund's objective is to provide capital growth and higher return over dollar deposit rates available in Hungary. The Fund has no preferred geographic allocation focus, and invests significant part of its capital into dollar-denominated, short term (typically with maturity of 0-3 years) government bonds or government guaranteed bonds, issued by members states of the European Union and the United States of America specifically. The Fund may also invest in other debt securities, bank deposits and collective investment securities.

Recommended for

Those who are looking for a USD-denominated medium-term investment; looking for a liquid investment opportunity that is available at any time; those who would like to benefit from a higher return than government securities with a maturity of over a year; those who accept that the higher risk of government securities over one year maturity may cause greater fluctuations in the fund's price

Investment activity

The proportions of short term US T-bills, term and sight deposits are allocated dynamically based on yield opportunities, rate expectations. The fund's objective is capital accumulation with low volatility, duration stands below 0.1 year for cautionary purposes. The fund has no exposure to Hungarian bonds or T-bills.

Glossary

Unit Price (Net Asset Value per Unit): shows how much of the Fund's assets are available per unit, at which value units can be purchased or redeemed. We present the unit price according to the date of preparation of the report - the last distribution day of the previous month.

Settlement: how long after the purchase / redemption order the financial settlement takes place. (Eg: in the case of day T + 3, the transaction will be settled according to the unit price valid on the 3rd trading day after the order is placed.)

Investment period: the investment period is usually divided into short, medium and long term. In the short term, they typically think for a period of about one year, in the medium term for a period of about one to three years, and in the long term for more than 5 years. The recommended minimum investment period is determined in relation to the Fund's risk (the degree of historical exchange rate fluctuations experienced).

ISIN: (International Securities Identification Number): a unique international identifier for securities.

Aggregate risk indicator: provides guidance on the risk level of this product relative to other fund products. It shows how likely this product is to cause a financial loss because of the market movements or because we cannot pay you. The indicator is based on the fluctuations in daily returns of the retrospective values modelled on the Fund's theoretical portfolio composition over the past 10 years. Lower values typically mean lower risk and lower expected returns, while towards higher values the risk and expected return increase. This classification may change over the life of the Fund.

Net asset value: the assets of investment funds less the value of their liabilities, the market value of the total assets managed by the fund. We present a value determined according to the date of preparation of the report - the last distribution day of the previous month.

Portfolio: means the composition and totality of the assets held by investment funds.

Standard deviation: the average deviation of the yields from the average value, ie the fluctuation of the daily yields achieved in the past, the table shows data (6 years, 1 year and 3 years) looking back from the date of reporting - the last distribution day of the previous month.

Sharpe ratio: the ratio of excess return over risk-free return to standard deviation, the table shows data for the 6-month, 1-year and 3-year periods from the date of reporting to the date of reporting - the last trading day of the previous month.

Max Drawdown Indicator: Shows the percentage of the largest rate drop since the start of the Fund compared to the highest exchange rate value achieved in the past.

Legal disclaimer
